

Access for Students at Home

A number of schools have inquired how students can access CareerTrek from home. The School Counseling Department at the Department of Elementary and Secondary Education and Missouri Connections have been working with *intoCareers*, the provider, and we are pleased to provide a temporary solution enabling students' access to CareerTrek from home.

CareerTrek engages elementary-age students in highly interactive, developmentally appropriate, and gamified career exploration. Students gain career awareness by completing activities and games to learn about careers and connect them to interests and skills.

If your school would like to provide access to your students to complete CareerTrek activities and explore careers for assignments, please provide the setup information below to parents. Parents need to complete the three simple steps on their child's computer. Once completed, the student should have access to CareerTrek.

We respectfully request parents/students refer any questions regarding CareerTrek through their school district counselor/representative and, if necessary, the school contact Missouri Connections if they have questions.

How To Enable CareerTrek on a Home Computer

Note: CareerTrek uses the specific IP Address for each computer.

1. Click the following link:
<https://careertrek.intocareers.org/admin/ctAuth.aspx?op=28&st=3172>
2. Enter the unique access code: **S0@cay1/X;F1**
3. Bookmark the web address for future access to CareerTrek:
<https://careertrek.intocareers.org>

That's it! No username or password is required to access the site. Simply go to the web address in bookmarked in Step 3.

For assistance, contact your school counselors or instructor.
