Reading Progress

Reading Progress is a transformational way for students to enjoy and be an active part of advancing their reading fluency and skills. Educators can upload a reading passage from a Word or PDF document or quickly select sample texts provided by ReadWorks. Students read the assigned passages aloud and submit recordings that can be accessed by the educator at any time. Educators can select students from their class to assign distinct passages based on their reading levels or interests and allow for multiple attempts.

Reading Progress

The screenshot displays the Reading Progress interface for a student named Christie Cline. The interface includes a search bar at the top, a navigation sidebar on the left, and a main content area. The student's profile shows a photo, name, and statistics: 41 Correct Words per Minute, 83% Accuracy Rate, 5 Mispronunciations, 2 Omissions, 1 Self-correction, 1 Insertions, and 0 Repetitions. The reading text is "The study of Earth's landforms is called physical geography. Landforms can be mountains, valleys, and plains. Landforms are physical features. It is important for students to know the physical geography of Earth. The seasons, the natural processes of Earth affect where people settle. Geography is one of a combination of factors that people consider here they want to live. The physical features of a region are often rich in resources. Within a nation, mountains and rivers are natural borders for settlement areas. In the U.S., major mountain ranges are the Sierra Nevada, the Rocky Mountains, and the Appalachians. Fresh water sources also influence where people settle. People need water."
