Robotics World Championship

GOOD TRAVELS

FIRST Robotics students traveled to Houston, Texas to participate in the Robotics World Championship. The team had a great day exploring the Space Center in Houston.

One of Gateway's Marshall Brennan Constitutional Literacy teams WON the annual Moot Court competition at Wash U's Law School.

The Marshall Brennan Constitutional Literacy Project is a national program that embeds 3L law students in public high school classrooms. They work carefully to build students' litigation skills and constitutional framework, preparing them to argue an appellate Moot Court case.

A big congrats to (above left to right) Sarah Yusef, Bertha Mendoza, and KeAndre Higgins who were declared the winners of the competition! Additionally, Mendoza was awarded Best Speaker Overall.

Kirasten Banks.*

Jagettes

Jagettes receive direct instruction from Harris Stowe's Honeycombs.

Brian House and John Everson took PLTW Engineering students on a Tech Tour of the City SC soccer stadium.

Students got to see some behind the scenes operations that the stadium uses during their games as well as technology they use for food service.

Moises Jimenez-Rodriguez, Benjamin Cummings, Aidan Kaylor, Briana Williams, Amorii Walker, Isaiah Jackson, Efrain Flores-Hernandez, and Adela Manzocapiz.

PLTW ENGINEERING

PTLW ENGINEERING

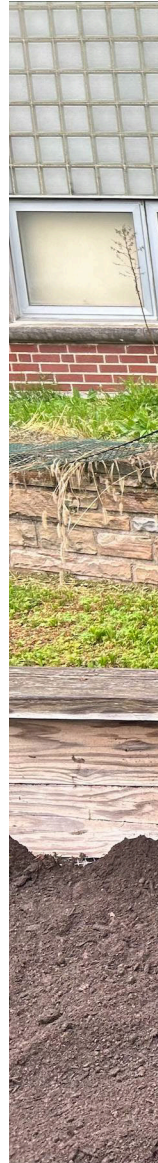

Gateway STEM presented a zoo habitat proposals at the Kingshighway SLPL branch, with the ACE Mentor program. This is the culmination of a semester long partnership with ACE which provides volunteers in the engineering and construction fields to work with high school students to see the real roles and opportunities in the construction industry.

Bottom: Axel and Sam Hornburg and Calyb Earl present their proposal for a walrus exhibit at the zoo.

Gateway's Newest Addition:

SNICKERDOODLE

Here are some fascinating rat facts:

1. **Highly Intelligent:** Rats are incredibly intelligent creatures. They have excellent memories, can learn new tasks quickly, and are adept at problem-solving.
2. **Social Animals:** Rats are very social animals and often live in colonies. They form strong bonds with their fellow rats and display complex social behaviors.
3. **Adaptable:** Rats are highly adaptable to various environments and can thrive in urban, suburban, and rural areas. They are found on every continent except Antarctica.
