Room 210

Dear student,

My name is Mrs. Brown and I am excited to welcome you and your parent(s) to the new school year! I know most of you are excited about your first year of kindergarten. So am I! I can't wait to build a relationship with you and your parents. Those of you who are a little nervous about kindergarten, that's ok. Just remember I will be by your side encouraging you to explore, think, and grow as we take this journey together. Kindergarten may be challenging at first but you will learn the rules and procedures before you know it! Just try to do your best every-day and everything will be swell.

Your parents, guardians and I all had to go through challenging experiences in kindergarten but that did not defer our dreams of becoming what we wanted to become when we got older. I believe because of these experiences as well as many others, it helped shape me into a dedicated teacher who is passionate about teaching children. As a result, I continue to be a lifelong learner beyond my kindergarten year. I went on to earn my Bachelor's degree in Early Childhood and Elementary Education from Harris Stowe State University with a minor in computer education. My certifications allow me to teach children from birth through 6th grade in the State of Missouri.

In addition, parents, remember I am a great resource to have if you need support. Therefore, please do not hesitate to ask me for assistance. I believe consistent communication between home and school is important in fostering educational success. Please contact me by Teams, phone, and email.

Thank you for entrusting me with your precious gift!

Sincerely,

Mrs. Brown
