

FIRST in Missouri

INSPIRE AWARD WINNER

Champions!

On Saturday, January 27th, 2024, the robotics team competed in the FIRST League Championship.

The team went undefeated in the qualifying rounds, and during alliance selection, Gateway paired with Team 13312 - The John Burroughs Bombers and Team 4982 - The Cafebots from Lutheran Church of the Resurrection.

The alliance went on to win the tournament. This is the second year in a row that we have won the League Championship.

Fun fact: for last year's win we were also paired with Team 13312 The Bombers.

Top row: Charlie Blair, Chris Eckstein, Moises Jimenez Rodriguez, Aiden Kaylor, Marcus Hope, Rory Robinson, Christian Nolan, Brandon House, Michael, Brian House. Bottom row: Savion Day, Axel Hornburg, Connor Luster, Amelia Bryant, Sam Hornburg, Thomas Exkstein, Solar.

TEACHER
SPOTLIGHT

Scheduling

According to a survey of secondary counselors, scheduling classes can be difficult..
Here are some reasons why:

- Many courses have prerequisites
- Large caseloads
- Wide course offering

Be sure to check with your counselor if you missed signing up for your classes.

Ganelle Claxton schedules classes with the
sophomores.

CAMPUS TOUR

AP English Language Students

The Saturday Scholars Program is for high school students, particularly from the St. Louis Public Schools and a number of county schools, to learn about human anatomy both in a lecture and lab environment, while interacting with Washington University medical students.

High school juniors, seniors or sophomores with a grade point average of 3.0 or higher who exhibit an interest and aptitude in math and science are strongly encouraged to apply to the Saturday Scholars Program. Freshmen will be considered only if there is space available. Students should be prepared to interact in small and large group settings and to participate in a group presentation the last Saturday of the program.
